

Ragot::ExtrudeMesh
::log_mesh_info

Ragot::MeshSerializer
::save_to_obj

Ragot::Mesh::get_faces

```
graph LR; A["Ragot::ExtrudeMesh::log_mesh_info"] --> C["Ragot::Mesh::get_faces"]; B["Ragot::MeshSerializer::save_to_obj"] --> C;
```

The diagram illustrates a dependency or call relationship. On the left, two white rectangular boxes with black borders contain the text 'Ragot::ExtrudeMesh::log_mesh_info' and 'Ragot::MeshSerializer::save_to_obj'. On the right, a gray rectangular box contains the text 'Ragot::Mesh::get_faces'. Two blue arrows originate from the right side of the left boxes and point towards the left side of the gray box, indicating that both functions on the left call or depend on the 'get_faces' function on the right.
